

MC1 Webbing Tie Down

SKU:

Product Categories: Military Lashings and Restraints, Military Range, Aerospace, Cargo Aids, Cargo Tie-Down Lashings and Restraints

Product Tags: Aerospace, MC1, resist abrasive, resist UV damage, Webbing, Webbing Tie Down

Additional Information:

NATO stock number:	3940-99-766-0786
Design Load LC:	3,000lb (1,360Kg)
Ultimate Load BF Min:	4,500lb (2,041Kg)
Webbing width:	44mm
Weight with 6m webbing:	3lb (1.36Kg)
Material:	Aluminium, Nylon, Steel

Short Description

A popular, lightweight, easy to use lashing, used extensively around the world, The MC1 was initially designed to secure helicopters to ship's flight decks. This nylon webbing tie-down has a fast-single action over centre mechanism which gives tension and locking in one easy movement. It is impossible to over tension and the slack can be taken up without reloading the mechanism. Release is a reverse of the single action, giving a fast and effective securing system for many applications within the freight handling industry.

Historically this unit was chosen by the MOD because of its simplicity and its outstanding robust quality and has outlasted many other tensioning devices. This Civil Aviation Authority and Ministry of Defence approved system is rigorously tested to the lofty standards required by the defence and aircraft industry. The nylon is treated to resist abrasion and the effects of sunlight, the mechanical components are treated with defence standard coatings to give maximum durability.

MC1 Brochure

Description

Built to Last

We coat all metal surfaces with high technology defence standard treatments giving maximum endurance. The nylon webbing is specially treated to resist abrasive and UV damage.

Quality Assured

Manufactured in our AS9100D & ISO 9001:2015 approved factory, we select samples from each batch and test to ultimate load. We guarantee unmatched quality and proven reliability.

Drallim's MC1 Webbing Tie Down is the epitome of secure cargo restraint, combining robust construction, versatile application, and user-friendly design. With Drallim's commitment to quality and customer satisfaction, you can trust in the MC1 Webbing Tie Down to provide unmatched security and reliability in your cargo operations.
