

# Cargo Aids

- This is a rugged, heavy-duty tensioner for use in all situations. At one end is a double-jaw claw-type connector, operated by a quarter turn of a knurled hand grip, which attaches to a securing ring or other suitable strongpoint. At the other end of the coupling is a chain pocket into which the nearest link of the lashing chain, after all the slack has been taken up, is secured by means of a half-turn of the lock. Turning the built-in handwheel on the body of the coupling produces the required tension in the lashing. Quick release is effected by a quarter turn of the handgrip.

## Specification

■ Cargo Aids Designation:	Quick Release Coupling
■ Part Number:	CA14
■ Admiralty Pattern No:	0263/263061
■ NSN:	3940-99-766-0785
■ Ultimate Capacity:	14000lb (6350 kg)
■ Weight:	4.61lb (2.10 kg)

## Quick Release Coupling

8,000lb (3269kg)  
 Operating Capacity
