

REACH Policy Statement

Drallim Industries Ltd supports the objectives of REACH, including protecting human health and the environment. Drallim Industries Ltd is aware of the requirements of the REACH regulations, its provisions and exclusions.

Drallim Industries Limited are aware of developments in European Union legislation regarding the harmonisation of member states' legislation with regard to the "Registration, Evaluation, Authorisations and Restriction of Chemicals (REACH)" Regulations.

Although we do not manufacture any product from base materials or chemicals we do supply equipment purchased, assembled and tested on our site. To this extent Drallim Industries Limited have put in place the following REACH Initiatives

- We control our suppliers regarding the REACH regulations and have ensured to the best of our ability that the products purchased do not contain any of the substances excluded under the Regulations.
- We request compliance statements from our sub-tier suppliers where appropriate
- It is the company's expectation that all sub-tier suppliers using substances manufactured in, or imported into, the EU for use in our products will be registered as necessary, thereby securing continued product supply.
- Drallim Industries Limited ensures, through constant review, that we, our customers and suppliers work as a team in order to satisfy the requirements of REACH.

Under the REACH Regulations, Drallim Industries Ltd is aware that substances manufactured or imported into the European Union (EU), including substances in preparations in quantities of one metric ton or more per year are to be registered unless exempt. This applies to individual chemical substances on their own, in preparations or in articles (if the substance is intended to be released during normal and reasonably foreseeable conditions of use from an article).

As the Accountable Manager it is my responsibility to ensure the controls that we put in place are adhered to, are regularly reviewed for their effectiveness by our Engineering and Procurements team, ensuring that these requirements are flowed down to our sub-tier suppliers.
