Aircraft Door Barrier Nets EMBRAER E170/175, E190/195

**Aircraft Door
Barrier Safety nets
Embraer E170/E175
E190/E195**

- Open Doors, access panels and hatches on parked airplanes can be potential safety hazards for airline personnel unaware of the opening.
- The EMBRAER E170/E175, E190/E195 Door Safety Barrier (Door nets) are designed to be fitted into the passenger and crew entry doors of the Aircraft whilst maintenance work is carried-out in Aircraft Hangers.
- No tools are required to fit these door nets, so they can be quickly fitted without any delay. (See instruction manual for installation details)
- The purpose of the door net is to provide a visual safety measure, to alert the personnel working inside of the aircraft that care should be taken when working in close proximity to door openings.
- Can be used when the doors are left open to cool the aircraft in high temperatures. Negates the requirement of the air-conditioning, which is both a cheaper and a greener solution.

EMBRAER E170/175, E190/195 (238CA29) BARRIER DOOR NETS SET		
Door Key (refer to Figure 2)	Door Description	Part No
PDF	Passenger Entry Front Door	239CA29
CDF	Crew Entry Front Door	240CA29
PDR	Passenger Entry Rear Door	241CA29
CDR	Crew Entry Rear Door	242CA29

If you have a requirement for a different aircraft type, please contact us for more information.
For new projects, access to aircraft would be a requirement to allow for design work and trials.
